Englischsprachige Produktankündigung:

Joe Monti is a working comedy magic pro and also consulted for Criss Angel's Mindfreak. Fairly recently, he released his stand-up version of a 3 Card Monte routine and now he is releasing his original thumb tie.

This is his version of the classic thumb tying plastic zip-ties or cable ties. Magicians and escape artists have been using different items for the thumb tie for years including; twist-wires, rope, twine, electric tape and rubberbands. While I have heard of the cable tie thumb tie before this release, I have no doubt Joe independently came up with this.

The DVD is extensive yet is well-paced with little padding. Joe explains his full routine, bits or business, the process of picking the audience, the actual thumb tie and exact details to make the routine entertaining. Joe is very clear in his explanations and uses footage from live performances to detail different parts of the routine. Everything you need to know to present a thumb tie with zip ties can be found here.
