Effekt:

The magician shows a deck of cards and opens it in a fan. Using a joker as an indicator, he moves it face up along the cards until a spectator asks him to stop. The joker is inserted in that precise place so a card is selected. The spectator shuffles the deck and keeps it. The magician says he will show how "the hand is faster than the eye", and invisibly makes the card vanish from the deck and travel to the card case (or anywhere else)
