uke Dancy has a devious mind. His devious creations have made him a world-renowned magician. He works for Criss Angel doing devious things.

Misprint is one of Luke's coolest tricks. It's a completely new plot in magic: you come across a really badly printed Bicycle card (which can be signed) and then you visually cause the ink to slowly move down the card so that it sits in the correct position. You can then hand the card out as a souvenir. Words can't explain how cool it looks when the ink starts to move.

You'll receive printed instructions and two gimmicked cards, which will allow you to perform the trick with a red and blue Bicycle deck. Just add the card to your deck and you're ready to go.

This is a low price for such a great moment of magic that you'll definitely add to your wallet and bring out at every opportunity.
