Reveal a playing card or duplicate a drawing on a business card hidden completely under an opaque dinner plate under test conditions! A spectator selects a card while your back is turned and places it under a plate. You are still able to divine it simply by placing your hands over the plate. There is nothing concealed in your hands at any time! Fools even the most well-informed magicians! Use a borrowed deck of cards if you wish; there are no mirrors, no sleights, no impression devices of any kind utilized for this effect! There are NO marked cards, and the cards themselves can REALLY be shuffled by a spectator. NO stacks to worry about, NO switches, and absolutely NO setups!
