DIN A4, 28 S., Mark Leveridge Magic, Exeter, Devon, England, 1995, Spiralbindung This lecture book features full details of eight new close-up effects created by Mark Leveridge. There is magic with coins, a diary, cards, chips, bank notes and Jumbo cards - each routine well thought out and with the emphasis on subtlety rather than sleights. The 28 pages contain detailed descriptions of the effects, the requirements and set-ups and the presentation, and there are 43 clear line diagrams to speed your understanding. With the exception of an Okito Box, there are no specialised props required - everything can be made up or easily acquired. If you are looking to add magic for either strolling work or close-up shows, SOLUTIONS will not disappoint you!
