Umschlagtext: Inf you enjoy card magic, you will eventually read this book. The only question is wheter you will read it befor or after being fooled and entertained by a trick contained within...

Volume One set the standard for semi-automatic card tricks. Choice material with strong impact and clever presentational ploys helped to make the first volume an instant bestseller.

In Volume Two, you will find almost 70 professional card tricks and routines. These are not your typical self - working card tricks. Clever principles and devious subtleties have supplanted sleight of hand. Unlike many self-working tricks, these do not appear to be self-working to the audience. The latest technology along with entertaining bits of byplay have been used to create magical effects which will not only amuse but also astound.
