Where the Jacks are Jills....

The Jill Deck is the brain-child of the cutting-edge artist, Annabel de Vetten.

These cards feature Annabel's own original artwork of her "Beautiful Strangers."

With the combination of high-quality playing card stock, and Annabel's iconic figures, I'm sure you'll agree that these cards will take playing Solitaire to a new level.

And for the Magic Enthusiast in your life, the artist has included several gaffed cards to help make miracles just that much more seductive. There's a color change that...well, you'll just have to see for yourself.

This deck contains more than the usual 52 cards plus Jokers. We have added some of the most important gaffed cards in card magic. Others were specifically created for the Jill Deck. As we haven't included tricks in this deck, how you use these gaff cards is entirely up to you.
