Do you want to perform incredible feats of magic without investing hours of practice or money for special props? **Magic Made Simple** will teach you core concepts using common everyday items. In Act 1, you will learn to make ordinary balls appear, disappear, penetrate through solid cups, and even jump into a spectator's closed hand! You will master the mystery of causing a borrowed finger ring to melt through an ordinary piece of string and magically produce the four aces from an ordinary shuffled deck of cards!
