### **A Completely Impromptu spoon bend with no gaffs or gimmicks! Powerful, Visual, and Close-up!**

The Gallerian Bend takes the concept of bending a spoon using just the power of your mind to a whole new level! It is a completely impromptu spoon bend that you will immediately add to your close-up repertoire! Easy to perform without any set up and using just a regular spoon.

Erick has been literally refining Gallerian over the past 3 years now, and not only trying to make-it visually beautiful, but also making it something very practical to perform in all type of settings.

### **Can this be performed surrounded?**

Yes! The beautiful thing about gallerian, it's actually viewable completely (Surrounded). This effect could be performed as walkaround, close-up or on stage.

## Produktinformation

---

### **Does this use a gimmicked spoon?**

No! The spoon is not prepared and could be borrowed if you don't mind giving the spoon back to the owner in a bent condition.

### **Can this be performed with a fork rather than a spoon?**

Yes. We actually think it looks even better! Due to narrower 'tyne section' surface.

Running Time Approximately 19 min
