The mantra at Expert Playing Card Co. is to innovate, always innovate. And even while innovating they always keep the working sleight of hand performer in mind. With the Classic Twins Playing Cards, they proudly introduce some revolutionary new playing card features with a series built for performance.

New Classic Finish: This new finish has a different embossing pattern and feel. It's a tiny bit thicker and a little more flexible, while maintaining high quality and excellent edges.

Two-Deck Twin Box: Classic Twins is also an introduction to an EPCC exclusive two-deck twin box. This convenient tuck box made of fine stock (embossed and printed using UV spot coating for exceptional detail), holds two poker packs and still maintains the proportions of a single deck tuck. These two decks feature a beautiful back design (one red deck and one blue).

Expert Classic Faces: These retro-style faces were drawn by hand; they resemble the faces used on many standard decks today but have their own Art Nouveau style. Magicians using these cards don't need to fear that their audiences will think them suspicious, but they are different enough from standard to be extremely appealing.
