

## Lotto Flash Wallet

Art-Nr.: 19842 / GTIN: neu / Marke: [Tucker, Stephen](#)

**Supplied:** You have been supplied with a specially adapted (by hand) leather wallet.

**Preparation:** Fold a £10 note in half and then in half again. Using a *Pritt* glue stick (double sided tape etc.), stick it to a pre-play Lotto ticket (at one corner) and fold the edges of the £10 down until both folded packages (glued back-to-back) are the same size.

**Set-up:** Fold another pre-play Lotto ticket so that it looks the same as the Lotto ticket side of the gimmick. Slip this into the pocket in the right side of the wallet. Place the gimmicked note/Lotto ticket into the pocket on the left side with the £10 side uppermost.

**Note:** I cut away the lower game panel from the Lotto tickets so that they and the £10 note are

and tables the wallet.

I will refer to the above move as *the switch* from now on.

You will now *visibly* change the Lotto ticket into a £10 note... Unfold the Lotto ticket to show it then fold it up again and, in a gesture, secretly (under cover of your fist) turn the packet over so that the £10 side is uppermost. Unfold the £10 side of the gimmick and show it. It only remains for you to pick up the wallet, with your right hand, flip it open and show that the Lotto ticket is back in the wallet. The two items have changed places!

Now for a repeat... Fold the gimmicked note/Lotto ticket up again and replace it (still £10 side uppermost) into the empty side of the wallet and... perform *the switch*, as outlined earlier, then table the wallet closed again. Unfold, and show.
