## Tear a Bill

Art-Nr.: 19503 / GTIN: neu

From the fertile mind of Michael Howard comes this wonderful improvement of a well known bill tear. To the best of our knowledge this trick was made famous (and probably invented) by Jim Ryan, one of the top close-up magicians of his time.

The basic effect is that a borrowed bill is initialed by owner, then folded several times and then torn to bits.

The signed bill is found in your pocket completely unharmed and is returned to the spectator all in one piece. It's a real reputation maker and quite easy to perform.

perform.

The original effect was accomplished with a switch for a fake dollar bill.

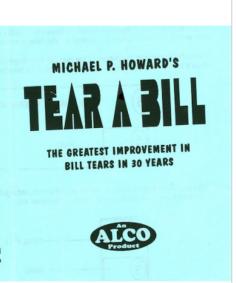

switch for a fake dollar bill.

Later, someone came up with a routine using a fake as in illustration #1.

Now, Michael has come up with a fake (see illustration #2) that allows you to do the effect with almost any bill that spectator offers. A ONE, FIVE, TEN or TWENTY.

Take the time to really learn the handling and you will find this to be one of the best close-up tricks vou've ever purchased.

tricks you've ever purchased.
