The MOST VISUAL cube solve on the planet!

After the stunning release of his Venom Cube, Henry now introduces his unique instant solve system: **RD INSTA**. With absolutely NO MOVEMENTS at all, you INSTANTLY SOLVE a mixed up cube like CGI EFFECT (You have to see it to believe it!). It is so visual that you will swear the stickers themselves are changing colors! After the solve, you can then IMMEDIATELY hand out the cube for examination.

Thanks to the revolutionary non-elastic design, the mechanics is extremely practical and reliable. It is a gimmick that will last forever. Our new magnetic block design also allows you to install the gimmick into ANY RD CUBES in just around 15 seconds.

You will also learn the signature One Cube Routine that is worth the whole price of the project. Finally, our guest, the amazing talented magician, Vincent K., will explore many amazing ideas you can apply with the **RD Insta** gimmick.
