CASH CARD

Created by Jesse Feinberg © 2005

Thank you for purchasing my second trick ever. I have had the Cash Card idea for a while now, but I had just come up with this new "flap" idea at the beginning of 2005. The gimmick is so much fun to use! I hope you have a great time with your new Cash Card.

Effect: A deck of cards are cut, and the spectator is asked to remember a card. The card is taken out of the deck, and the deck tabled. The magician then asks to borrow a dollar bill. These two objects can't normally pass through each other... To demonstrate, the card is placed inside the bill to show that it is "trapped" inside the fold. It is shown all around. Slowly, the magician pulls the card through the bill's fold, melting through the paper! Immediately, the card and the dollar are shown all around. The card is returned to the deck, and the bill is handed back to the spectator. Ready to go again...
