A masterful routine of visual magic! Six cards, shown blank on both sides, are dealt out in pairs. As each pair is picked up and pushed through the performer's hand, winning cards for various games are "printed" visually:

- Two red Threes for Canasta
- The Ten of Diamonds and the Two of Spades (Big and Little Casino) for Casino
- An Ace and Ten - 21 - for Blackjack

The face of one card then vanishes leaving a five-card Poker hand. The hand is worthless, however, but when the cards are pushed through the hand, the Poker hand changes to Four-of-a-Kind!
