Eric DeCamps' "Jokers Are Wild" has been a feature of DeCamps' act and a highlight of his "Stars Of Magic" video tape. Now you too can add a professional-caliber routine to your performances.

A selected card is placed face down on the table. Talking about the game of Blackjack, you remove a packet of six jokers from your wallet. Show that the selected card is a three, and one at a time, cause each of the six jokers to transform into threes until all seven cards are identical! Pointing out that all the threes total twenty-one, a winning hand in Blackjack, the entire packet suddenly changes into a fistful of money -- with no cards in sight!

Comes with a 20-page illustrated booklet, a leather wallet, a special "money card," and all the necessary gaffs, use your own deck (Poker Bicycle). Sleight-of-hand required.
