This fine book of assorted magic has been out of print for years. Finally reprinted as a hardbound book with dust jacket, it is again available to delight today's magicians who do not have their copy.

Emphasizes coins, cards, and other close up magic, but also has some important club or stage effects.

**Wonderful Routines of Magic** is an overlooked gem in magic publications. The late **Ellison Poland** published the first edition in 1969. A number of contributors, including the author, offer a wide variety of magic effects for stage and close-up. There are seven effects offered by North Carolina's own **Bill Spooner** including the **Deceptive Roll Cut**. **Milliken's Transposition** is worth the price of the book. It is a double transportation with two halves and two quarters. **Ellison Poland** was a technical writer for Westinghouse and knew the art of writing magic instructions. He was also a great illustrator. The 251- page book is well illustrated with numerous line drawings. There is also a section on **Decorating and Finishing Magical Apparatus**. The table of contents has 55 entries. **Wonderful Routines Of Magic** concludes with an annotated bibliography. The book has an attractive dust jacket. The hard binding is black with gold lettering. You will not be disappointed with the quality of the content or of the bookbinding. A great buy!
