A regular pencil is shown all around. When you wave your hand over the pencil, the eraser jumps from one end to the other! Give the pencil a shake, and the eraser jumps back to the other side... SNAP the pencil in half and the eraser jumps from one half to the other! You can even cover one end in your pocket, and the eraser jumps back and forth! The two broken pieces are immediately handed out for examination... You are left totally clean!

Other routines/effects are included. Limitless possibilities!
