CRIMEWAVE

An amazing and effective TRIPLE prediction. You lay an envelope in full view of the audience (or give it to someone). You lay two simple lists on the table, one containing 30 villains - the other 30 serious crimes. You show a packet of white cards that have the numbers 1 to 16 printed on them, the numbers covering both sides of all cards and there is nothing gimmicked about them. Without any coercion, or equivocation, a spectator discards all but two of the cards. He really has COMPLETE FREEDOM here.

Before you go any further you STATE that the spectator has to decide on one VILLAIN - one CRIME and the length of the JAIL SENTENCE. This he does using his freely chosen number cards and the villain & crimes lists. This is straight-forward and direct - no messing around.

He might arrive at, villain = MAD FRANKIE crime = MURDER jail sentence = 17 years. When your prediction envelope is opened by an audience member there is a real-size copy of the top half of a front page of a newspaper with a glaring headline, which says: **MAD FRANKIE GETS 17 YEARS FOR MURDER!**
