52 Memories honors the legacy of one of the most promising card magic creators of our time. It is one of those rare magic books that pass on the most fruitful creations from a lifetime of tinkering, experimenting and performing. It is an important book that shares the late Jack Parker's lifelong mission to create the most amazing miracles ever decoded from a single deck of fifty-two.

52 Memories is one of the most important magic books to be published in the last ten years. **Tomas Blomberg**

Jack Parker had a knack for producing card tricks that were beyond extraordinary. He had an uncanny ability of twisting plots in new directions while using as few sleights as possible. His magic was typically easy, often visual and always astounding. He received praise from many of card magic's elite and several even heralded the first edition as one of the most important published this decade.
