What sets Triple Intuition apart from other card effects is the mixing of techniques in one card show. Dani has designed a deck that appears normal and random at every turn, but hides a secret that allows the magician to know selected cards and where they are in the deck.

Dani DaOrtiz combines this preparation in the deck with a clever stack that allows you to reveal selections at thought-of numbers, from shuffled packets, and more. Best of all, the effect does not require any special skill or sleights. For a formal close-up show, **Triple Intuition** is one of THE most powerful closing effects! Master magicians such as Christian Engbloom of the Fat Brothers have been using this tried and true effect to close their performances for years.
