**Grand prize winner of
MAGIC magazine's Living
Paper contest. Read all
about CHROMAGRAMS in
the October 95 issue.**

A spectator chooses a card. You then show three greeting cards, each with an autostereogram picture mounted to the front — Autostereograms are those 3D pictures you may have seen in the malls. One spectator has difficulty in seeing the 3D image. You will help him, you claim, by exerting your own tremendous imagination. Suddenly his card is there — in living color — and then, right before your very eyes, it SLOWLY FADES AWAY!
