CIGARETTA-CARD

Instructions by John Kimmons

There have been several different methods of performing a cigarette-card penetration, but we believe this to be the simplest and most effective method of all. Credit for the design of the fake card must go to Edwin, who first used the idea in 'Penetration Royale' which appeared way back in 1961.

A card is freely selected from a regular pack and this can be examined. A cigarette is removed from a packet and is then slowly made to melt through the playing card. The spectators around see it go in from the front, to protrude from the back. The card can be handed out for examination at the end of the effect.
