Englische Beschreibung:

Recounting a story of poker game: you show a giant poker hand with three sixes. Noticing the player on your right having three sevens, you discard one of the sixes and receive an eight. You now change all the card into eights. When you notice the player on your left has three nines, you discard an eight and pick-up a Joker. But, to your dismay all the cards turn into jokers - not just the faces - all the backs of the cards also change to jokers. Yes it's true, all faces and backs are shown as jokers. You are left with only three cards with no trace of any sixes, eights, or back designs. A visual routine which can be used on stage or up-close. Very easy to do."
