Aus der englischen Beschreibung:

In this book to be found the cream of the tricks, ideas and principles which have gone, over the years, into Louis S. Histed's monster note-book. Here is the life-time's harvest of one man's brilliant thought and patient experimentation. And as every harvest carries the seeds of the next, we are confident, that the principles which the author here discloses for the first time, and the new presentations he has devised for other effects, will bear fruit in the work of amateur and professional magical entertainer all over the world.
