Aus dem Klappentext:

In 2000, Wayne Houchin created an effect that would become his opener for the better part of the next decade. The concept was strange yet exciting. Raw, visual, and striking in its simplicity. A length of thread is swallowed and immediately pulled from your eye. It looks as real as it sounds. THREAD has become one of the most talked about and sought after effects in magic. W:H performs and reveals the exact method and presentation he has used to open his performances for almost a decade (The Geek Method). A method based entirely on sleight-of-hand and can be performed safely is also taught (The Sleight Method).

Also featured is a bonus effect: the classic broken and restored Gypsy Thread. Learn how to break a length of thread into several small pieces and then restore them in the fairest way possible. Wayne uses this effect as the perfect lead in to THREAD.
